

Newsletter - Product development in Asia  
July '06

**Product development in Asia:**

Utilising the unique skills in our Asia-Pacific facility, product development will focus around our Closure & Component technology. The ranges of products affected will be:

- 1/ Latches & Strikes
- 2/ Push Latches
- 3/ Motion Control Dampers

Typically these products, whilst having a high engineering content, also require tight cost control in the production environment. These needs make them ideal candidates for our Asia-Pacific facility who already produce these products in volume.

Please watch out for future product releases from the Asia-Pacific facility through the Home Page on the web-site & the TechTIPS newsletters

**Tech-Fast.Com Limited**

Specialises in the design & supply of technical plastic fasteners, closures & components. The company is active in all major global markets.
