NAFTA - Opportunities for local manufacturers:

A vital aspect of the strategy for the NAFTA region business is the need to foster long term relationships with the local manufacturing base. Tech-Fast will initially promote the ranges emanating from the EMEA & Asia-Pacific businesses in the region, however, we wish to develop products which are specific to the NAFTA customer base.

Therefore if you are a NAFTA based manufacturing business with the following skills, we would very much like to hear from you:

- 1/ Injection moulding of engineering polymers - specifically plastic fasteners
- 2/ Assembly skills - building 4 or 5 components into a product or sub-assembly
- 3/ Toolmakers - plastic injection moulding
- 4/ Extruders of plastic material - structural forms (not flexible)

Our company works within the ISO9001:2000 system & would expect our suppliers to be similarly capable, for our automotive based sales we also provide PPAP (Pre-Production Approval Process) documentation. Again we would favour suppliers who could support us in this type of request.

Importantly, we try to support innovation wherever possible, which could mean you are an individual with an idea, but no vehicle to launch it. We could help, please talk to us, we can provide confidentiality agreements to protect your ideas.

Additionally to this if you are currently manufacturing plastic fasteners & feel as though we could help develop your sales in EMEA & Asia-Pacific please also contact us. We can have open discussion regarding your ideas on how we could develop these markets with your products together.

We are a unique business leading our field of technical plastic fasteners, closures & components. We are looking for exceptional partners to help develop in the NAFTA region.

Tech-Fast.Com Limited

Specialises in the design & supply of technical plastic fasteners, closures & components. The company is active in all major global markets.
