Venting Filters:

Tech-Fast offers both Hydro & Oleophobic Venting Filters

As products increase in complexity & have a need to be 'sealed' from the external ambient conditions a strong requirement has arisen to also ensure that no moisture can enter into the sealed system, but air can pass freely ensuring that no pressure changes occur within the system.

Tech-Fast has now released for production these 2 new products aimed directly at providing a remedy to the issues highlighted above.

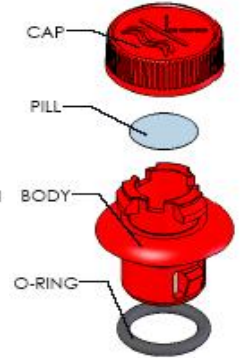

Utilising bespoke insert moulding equipment has ensured that the product is manufactured to the highest standard. This together with very accurate assembly equipment means that the Tech-Fast product meets all industry needs.

TF0405194
STANDARD VERSION
PA66
GREY

TF0405195
HI TEMP VERSION
PBT
RED

Typical market sectors are:

- Automotive - ABS braking systems, headlight & rear light assemblies
- Electronics - Black boxes, electric motors, ECU's & sensors
- Food & Beverage - Liquid bottling; filling, packaging & shipping

Different sizes & shapes can quite easily be incorporated into the insert moulding system, as indeed can alternative filter media. Please contact us to discuss your individual requirements.

Tech-Fast.Com Limited

Specialises in the design & supply of technical plastic fasteners, closures & components. The company is active in all major global markets.
