

**Product Announcement
May 2009**

Plastic Fastener Supplier releases a new range of products - Quarter Turn Rivets

Tech-Fast is pleased to announce the release of **another** new range of products.

Quarter Turn Rivets

These quick assembly products provide secure panel fastening as well very fast disassembly times for products which require servicing where ease of use & timing is critical.

Having selected the correct product from the range they are simply mounted into the panel aperture & driven home with a push of light pressure.

To dismantle the product, a ¼ turn via the use of the appropriate screwdriver will release the retained pressure of the panel connection. The part can then be withdrawn from the hole to facilitate servicing of the required product or feature.

The new '**Quarter Turn Rivet**' series is the latest addition to Tech-Fast's **Value Added Fastener (VAF)** programme which offers customers & users significant benefits over competitive product lines.

When it comes to '**engineered solutions to everyday problems**' talk to Tech-Fast first, we are where industry comes to for the answers to their fastening & fixing needs in plastic.

Tech-Fast (a division of GBK UK Limited)

Specialises in the design & supply of technical plastic fasteners, closures & components. The company is active in all major global markets.
