Plastic Fastener Company releases new Screw Rivet part numbers

Tech-Fast is pleased to announce 2 new additions to the range of Screw Rivets offered by the company

Screw Rivets

TF0405256-BLK

Hole size = 6.3mm

Panel range = 2.5 - 8.0mm

Head diameter = 17.8mm

TF0405257-BLK

Hole size = 6.3mm

Panel range = 2.5 - 8.0mm

Head diameter = 15.5mm

Manufactured in heat stabilised PA66 (Nylon)

Customised colour can be offered subject to minimum order quantities

Screw Rivets provide a quick & efficient method of securing 2 or more panels together. Simply placing the component into the prepared holes & pushing the male pin to fully lock. To remove the part, this is done by unscrewing the male pin from the body of the fastener. Upon removal the part will be ready to be used again.

'Push to set, unscrew to remove'

Screw Rivets can be used in both hard & soft material substrates, or a combination of both, such as an automotive trim application inside the passenger compartment or exterior trim, such as a wheel arch. Screw Rivets are a highly adaptable & dependable panel fastening system.

When it comes to '**engineered solutions to everyday problems**' talk to Tech-Fast first, we are where industry comes to for the answers to their fastening & fixing needs in plastic.

Tech-Fast (a division of GBK UK Limited)

Specialises in the design & supply of technical plastic fasteners, closures & components. The company is active in all major global markets.
